Frankfurt, 9 October 2023      Expo Real, the International Trade Fair for Real Estate and Investment, was held for the 25th time. From October 4-6, STRABAG Real Estate (SRE), STRABAG Property and Facility Services (STRABAG PFS) and ZÜBLIN presented the range of services from project planning and development to construction, operation and revitalization. The STRABAG Group presented itself with a newly designed and almost CO<sub>2</sub> neutral exhibition stand made of wood. "Progressive - sustainable - innovative" was the approach for this year's trade fair as well as for real estate projects and services. In line with the "cradle to cradle" principle, everything can also be reused.

The focus of the exhibition was on innovative real estate services and projects such as the H3ö office campus in Hanover, the BVK headquarters in Munich, the Upper One in Warsaw and the DC Waterline neighborhood development in Vienna. They exemplify the high level of consulting, data and execution expertise that the construction technology group offers its customers from a single source. The new **eco<sub>2</sub>**solutions service portfolio for sustainable and digital property and facility management also met with great interest.

### Climate-neutral value chain by 2040

STRABAG has set itself the goal of climate neutrality along the value chain by 2040. The focus is on measures in four major fields of action: CO<sub>2</sub> emissions, materials and waste, supply chain and construction life cycle. As the main driver of transformation, technology is a necessary instrument for leveraging the potential in all three pillars.

### Awards underscore sustainability goals

STRABAG's clear goal is to systematically reduce CO<sub>2</sub> emissions and resource consumption. The certifications by the German Sustainable Building Council (DGNB) and the Austrian Sustainable Real Estate Council (ÖGNI) underscore the company's commitment to

sustainability. At the award ceremony on Oct. 5 at Expo Real, several projects in the field of residential and commercial real estate from Germany and Austria as well as traffic route construction were honored.

**About STRABAG Property and Facility Services**

*The STRABAG Property and Facility Services group (STRABAG PFS) is an integrated real estate and industrial service provider for all types of real estate and properties, leading in digital and technical expertise. With **eco2**solutions we provide our customers with sustainable solutions in every phase of the property lifecycle - from offices to industrial and production sites, logistics centers to technical buildings and data centers. Our service portfolio includes technical and infrastructural facility management, property management, refurbishment and upgrading, and special industrial services. Our qualified employees provide all services in Germany, Austria, Poland, Slovakia and the Czech Republic - individually tailored to customers, industries and locations and with uniformly high-quality standards.
